

M900BE WATER PURIFIER

THE BENRAD M900BE WATER PURIFIER is based on the patented BenRad technology. Without any additives, it takes care of all kind of micro-organisms, breaking them down into carbon dioxide and water.

No other material gets in contact with the water than titanium, quartz glass and FDA-approved o-rings and sealings.

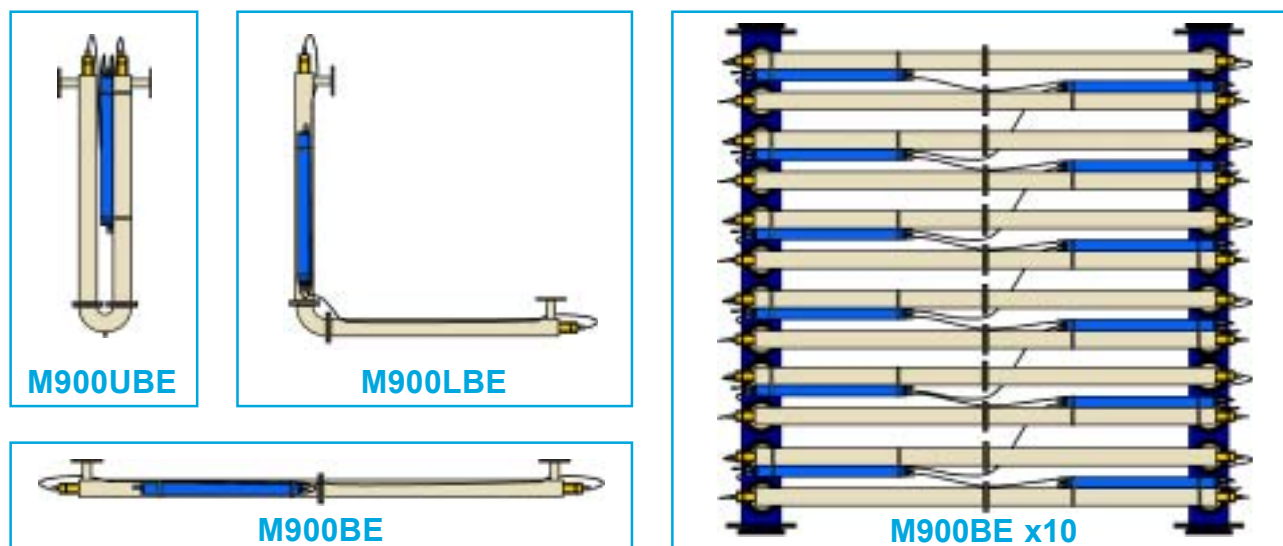

INSTALLATION, MAINTENANCE & SERVICE

The installation of a BenRad M900BE Water Purifier is easily performed by a plumber an electrician. It connects to your system through its DN32/PN10 flanges. The control panel includes alarm functions that can be connected to your control system for remote monitoring.

The M900BE Water Purifier has no moving parts and does not corrode. The service and maintenance is limited to periodical cleaning of the quartz sleeves and replacement of the lamps once a year.

MODULAR DESIGN

The BenRad M900BE Water Purifier can be set-up in different configurations to fit your purification needs, water flows and available space.
